TRANSFORMING VERTICAL
TRANSPORTATION

IEE

COMPANY PROFILE

IEE lifts is an entrepreneurship which believes in persistence and a foresighted vision. We as a family are passionate to excel, grow and serve our Best to the customer. We dare to dream and encompass the globe in our field of vision.

IEE lifts has grown to be a leader of vertical transportation in northern India that too in a little span of over two decades. Located in the tremendously growing Tricity, the company has carved a niche for itself by providing quality products that have excelled in every aspect .The highly customisable product, that we offer, is not easily available in the market. Our efforts were encouraged and appreciated so we started expanding our base, now we have three manufacturing units and corporate offices across Tricity .We are driven by contemporary ideas and revolutionary technologies which inspires us to nurture our Excellency.

PRODUCT *PROFILE*

IEE Lifts is manufacturing the complete range of elevator spare parts in house with great precision as the plant is equipped with world-class machinery.

IEE Lifts private limited manufactures a complete range of lifts which include.

- ▲ HOME LIFT ▲ HYDRAULIC LIFT
- ▲ PASSENGER LIFT ▲ PANORAMIC LIFT
- ▲ HOSPITAL LIFT ▲ GOODS LIFT

INFRASTRUCTURE

As our company has created a stronghold in the field of vertical transportation, the state of the art manufacturing units are spread over 28200 square feet. Our manufacturing units are equipped with world-class machinery including CNC lasers, bending and shearing machines with the family of more than 150 people working together.

MORE THAN **90%** OF COMPONENTS
ARE MANUFACTURED IN HOUSE

HOME LIFT

Home lift is what we call our celebrity product as we manufacture the Elevator as per the likings of our customers and their loved ones

- Single phase power ○
- Suitable for indoor/outdoor ○
- Tailor-made dimensions ○
- Overhead/machine room not required ○
- Traction/ hydraulic lifting solutions ○

- Just 5 inches of step is required
- Revolutionary technology breakdown
- Efficient operation Lighter cabs
- Compact
- Gear less drive

MRL LIFTS

Compact gear less drive offers smooth, efficient operation. Lighter cabs with more efficient drives allow smaller, space-saving traction sheaves.

Advantages:

▲ **Roping 4:1**

With pulleys under the car frame, providing excellent stability and great comfort.

▲ **Optimisation:**

Self-supporting bed plate and pulley beam prepared to adapt to the shaft.

▲ **Adaptability:**

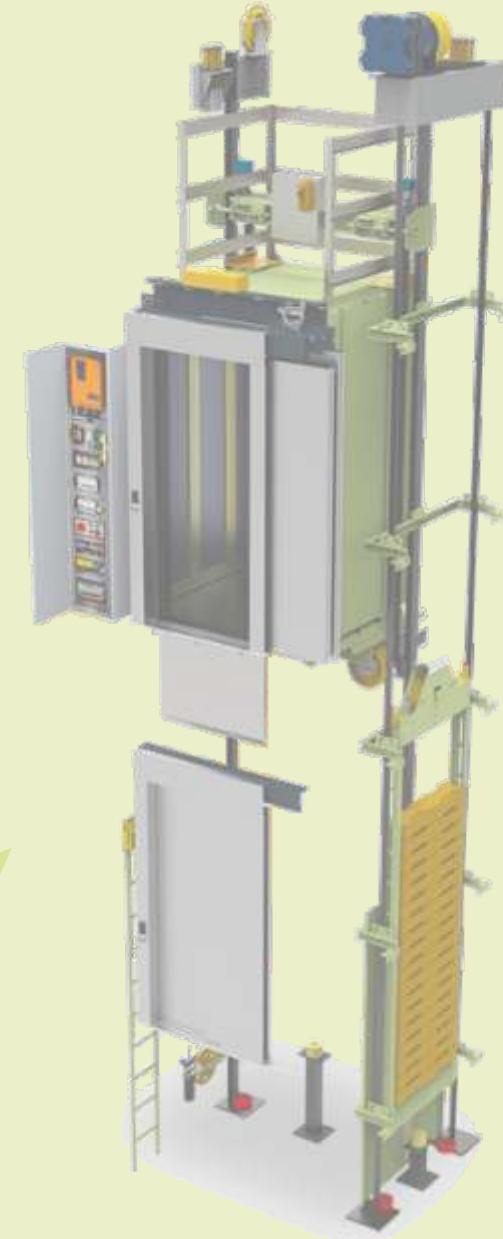

Possibility of anti-creep for high specific loads.

Drive: Gearless/ frequency controlled

Technical Features

▲ **Duty speed:** 0.5 m/s being able to reach up to 1 m/s

▲ **Roping:** 4:1

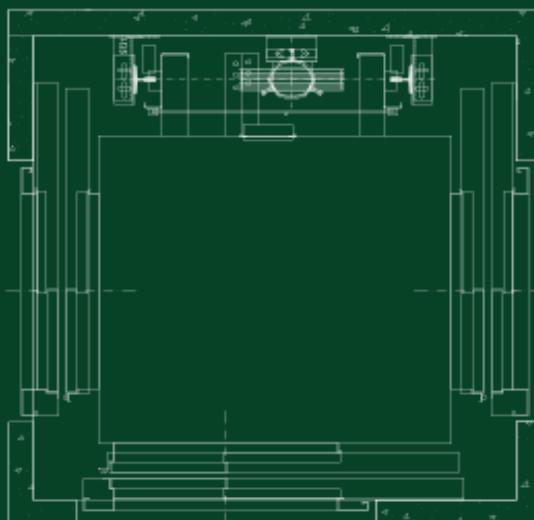

Posh

HYDRAULIC LIFTS

Silken is the ideal hydraulic lift for existing buildings, capable of adapting to any kind of shaft. Our hydraulic technology allowed for an incomparable space saving and utilisation while allowing your loved ones to travel in comfort.

Hydraulic lift is the well trusted mechanism for a number of decades. We have collaborated with GMV Italy for this product as they are world leaders in hydraulic solutions and the technology they have developed is way ahead of anything in competition.

Advantages:

▲ Convenience:

There is neither a requirement for machine room nor a deep pit

▲ Versatility:

We adapt each lift to each different shaft optimising spaces.

▲ Reduced pit and headroom:

In existing buildings, we adapt our lifts in compliance with the Regulations for pit and headroom. Is standards

▲ Comfort:

Excellent level of comfort, equivalent to a traction lift using electronic valves. No noise can be felt inside the cabin.

▲ Adaptability:

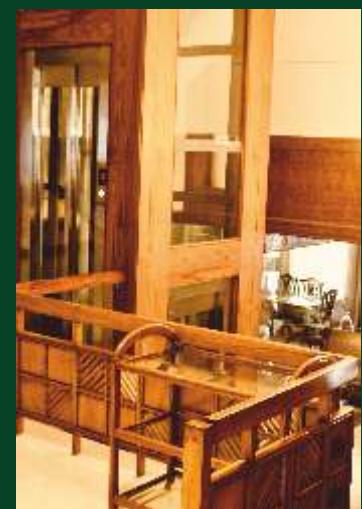

Easy control and maintenance.

▲ Emergency rescue:

Automatic emergency system always active during the descent, even in the event of power failure.

▲ Energy saving:

The hydraulic solution consumes electricity only while elevating and doesn't consume electricity while coming down.

Versatile

Posh

Silken

Star Liner

STRUCTURE

PLANNING AN ELEVATOR OUTDOORS?

Well that's not an issue as well as we have a facility to assemble a pre engineered structure which can be fabricated outdoor as well as indoors Glass cladding looks extravagant.

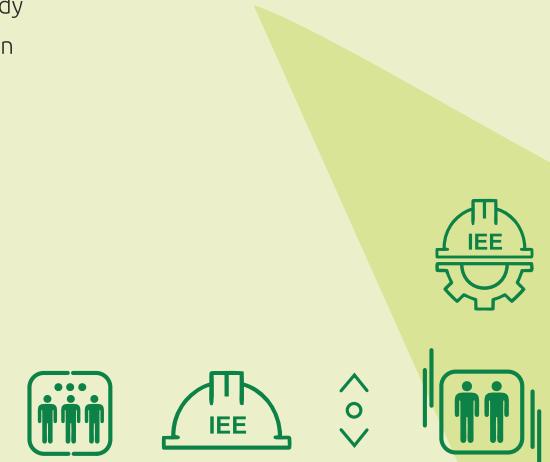

Vivek High School Chandigarh

SAFETY FEATURES

Following are the Elevator Safety features :

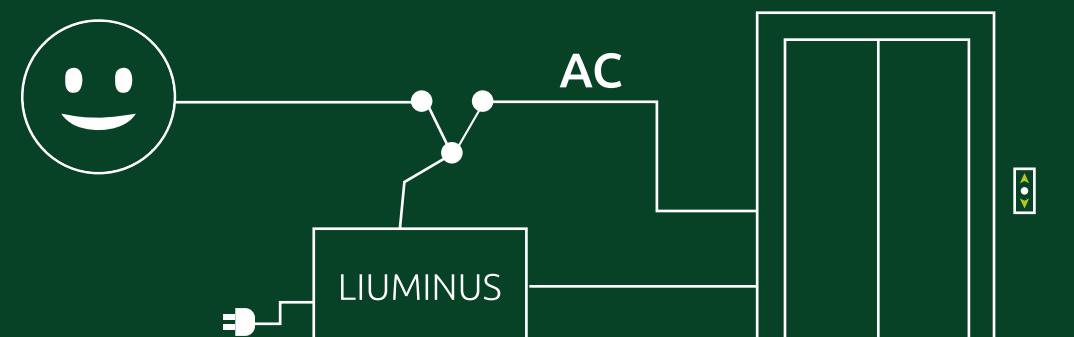

- ▲ Daily automatic brake testing
- ▲ Proven rope technology that is easy to inspect
- ▲ A curtain of light to aid safe entry and exit
- ▲ In an elevator system in which safety mechanism is provided on a body movable in the hoist way for application to a guide rail to stop said body
- ▲ In an elevator system in which a safety 5 brake rail clamp is provided on the car for engaging a guide rail to stop the car
- ▲ The emergency evacuation latch, located in the ceiling of most cabins
- ▲ Almost all elevator cabins have an emergency alarm switch that can be manually operated.
- ▲ Accurate landing that reduces the risk of tripping
- ▲ Door opening button to control doors when the elevator is stopped
- ▲ Two-way communication system for instant, 24/7 contact with the IEE Customer Care Center in case of emergency
